WORK EXPERIENCE

Software Developer In Test
Ryanair

01/2019 – Present
Europe's Favourite Airline: https://www.ryanair.com

Achievements

- Created scalable Test Automation Frameworks and Tools and achieved over 80% coverage in sum of Front-end and Back-end Solutions
- Implemented over 200 High-Quality (Web/Mobile)UI / API / Unit tests at every development stage insuring effective tests coverage
- Executed (Adobe) Analytics Automation Testing making sure maximum products conversion rate is delivered to PO and Analytics teams
- Accelerated Automation Tests Preparation, Execution, Results Analysis for CI pipeline by 50% (before ~ 30 min, after ~ 15 min) of total time after migrating to AWS Docker stack
- Reduced up to 75% of manual work and manual testing for the project
- Accomplished all above within flexible Scrum team of great people supported by BDD-like environment in less than 1 year

Tools: JavaScript, Protractor, Selenium, Cucumber, Jasmine, Jenkins, Docker – Java, Karate, JUnit, Postman, Jira, TestRail, Confluence

Test Automation Engineer
EPAM Systems

09/2017 – 12/2018
Project: Password Portal https://password.epam.com

Achievements

- Developed Test Automation Framework from Scratch that covered estimated by 60-70% of main functionality of the Password Portal
- Integrated Cross-Browser Chrome/FireFox/Safari testing with existing framework with 0% budget increase
- Performed RESTful Web-Services API Testing for internal APIs
- Created 5 Test Nodes Infrastructure based on Jenkins and Docker; for platforms: Linux, MacOS
- Involved in Agile Scrum Development Process

Tools: Java, Selenide, Selenium, TestNG, Cucumber, Git – RestAssured, Maven, Jenkins, Selenium Grid, Jira, QaSpace, Confluence

Software Test Engineer
EPAM Systems

02/2016 – 09/2017
Projects: Cancer Registry http://omr.by/home-en | Banking https://halykbank.kz/en

Achievements

- Supervised QA team of 3 QA Engineers and Successfully Released Final Product
- Implemented 30 New Tests and Features for current Automation Project
- Configured Jenkins CI and Allure Reports for Testing Pipeline
- Executed Functional, Non-Functional, UI, New Features Testing assuring approximately 80% tests coverage versus less than 20% of minor and trivial bugs rates for the Release Decision
- Designed and Reviewed Test-Cases, Test-Suites and Check-Lists

Tools: Java, IntelliJ IDEA, TestNG, Maven, Selenium WebDriver, GIT, Jenkins – MS SQL, Jira, QaSpace, Confluence, Allure

SKILLS

Testing layers: Unit, API, UI

Python3: Algorithms, Data Structures, Math

NodeJS: JavaScript, Protractor, Jasmine

Oracle: Java8, Selenide, JUnit, TestNG

API(Services): Karate, RestAssured, Postman

BDD Frameworks: Cucumber

Front-End: Bootstrap 4, JQuery, HTML5/CSS3

CI/CD tooling: Docker, Jenkins, Git

OS platforms : MacOS, Linux, Windows
